

# **FISHER & PAYKEL**

## **DOWNDRAFT INDUCTION COOKTOP**

---

**MINIMAL**

CID364DTB4

**INSTALLATION GUIDE**

**US CA**

**⚠ WARNING!****Electric Shock Hazard**

**Failure to follow this advice may result in electric shock or death.**

- Disconnect the appliance from the mains electricity supply before carrying out any work or maintenance.
- Connection to a good earth wiring system is essential and mandatory.
- Alterations to the domestic wiring system must only be made by a qualified electrician.

**⚠ WARNING!****Cut Hazard**

**Failure to use caution could result in injury.**

- Take care: some edges are sharp.

**WARNING!**

To prevent overheating of the electronic components adequate supply of cool air and direct unrestricted ventilation to the room is required. A gap of min. 3/16" 4mm height over the width of the cooktop chassis is required to allow the internal ventilators operating unrestricted. (Refer to 'Clearances').

**IMPORTANT - SAVE FOR THE LOCAL ELECTRICAL INSPECTOR'S USE**

The models shown in this installation guide may not be available in all markets and are subject to change at any time. For current details about model and specification availability in your country, please go to our website [www.fisherpaykel.com](http://www.fisherpaykel.com) or contact your local Fisher & Paykel dealer.

**READ AND SAVE THIS GUIDE****General Use**

- Read these instructions carefully before installing this product.
- **WARNING: TO REDUCE THE RISK OF FIRE, USE ONLY METAL DUCTWORK.**
- Installation must comply with your local building and local electricity regulations.
- Electrical installation (including electrical grounding) must be done in accordance with the National Electrical Code, ANSI/NFPA70 - latest edition and/or local codes. In Canada: Electrical installation must be in accordance with the current CSA C22.1 Canadian Electrical Codes Part 1 and/or local codes. Particular attention shall be given to the relevant requirements regarding ventilation.
- This appliance is to be installed and serviced only by Fisher & Paykel trained and supported service technician or qualified person.
- The manufacturer accepts no responsibility for the incorrect installation of appliances. Incorrect installation may result in personal injury, damage to property and may invalidate any warranty or liability claims.
- Do not modify this appliance.
- Do not use or store flammable materials on or near this appliance.
- Packing elements (eg plastic bags, polystyrene foam, staples, packing straps etc) and tools should not be left around during and after installation, especially if they are within easy reach of children, as these may cause serious injuries.
- Make sure you recycle the packaging material.
- Before disposing of any appliance, make sure that it can no longer be used and that all hazardous parts are removed or made harmless, so that children playing with the old appliance cannot harm themselves.
- Only genuine replacement parts may be used for servicing the appliance. These are available from your nearest Fisher & Paykel Service Center.
- This cooktop must be connected to the mains power supply only by a suitably qualified person.
- To eliminate the risk of burns or fire by reaching over heated surface units, cabinet storage space located above the surface units should be avoided.
- **DO NOT** use adapters, reducers, or branching devices when connecting the cooktop to the mains power supply to prevent overheating and fire.
- The power supply cable must not touch any hot parts and must be positioned so that its temperature will not exceed 165°F (75°C) at any point.
- **CAUTION :** To reduce risk of fire and to properly exhaust air, be sure to duct air outside - Do not vent exhaust air into spaces within walls or ceilings or into attics, crawl spaces, or garages.
- The discharge air is to be directed to the building exterior.
- **WARNING - TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK, OR INJURY TO PERSONS, OBSERVE THE FOLLOWING:**
- a) Installation work and electrical wiring must be done by qualified person(s) in accordance with all applicable codes and standards, including fire-rated construction.
- b) Ducted fans must always be vented to the outdoors. To eliminate the risk of burns or fire by reaching over heated surface units, cabinet storage space located above the surface units should be avoided.
- To eliminate the risk of burns or fire by reaching over heated surface units, cabinet storage space located above the surface units should be avoided. If cabinet storage is to be provided, the risk can be reduced by installing a non-combustible fixture that projects horizontally a minimum of 5" (127mm) beyond the bottom of the cabinets.

## INSTALLATION CONSIDERATIONS

### BEFORE INSTALLATION

#### Please ensure the following:

- A suitable disconnection switch is incorporated in the permanent wiring, mounted and positioned to comply with the local wiring rules and regulations. A means of disconnection with at least a 3mm air gap contact separation in all poles must be incorporated into the fixed wiring in accordance with the wiring rules, unless the local wiring rules allow for alternative means.
- The benchtop is made of a heat resistant material.
- There is adequate flow of cool air from the cabinetry to the base of the cooktop. You may ventilate from adjacent cupboards, but ensure that the available air supply will not be restricted.
- The ventilation area must be equivalent to 6 3/16in<sup>2</sup> (40cm<sup>2</sup>) Refer to 'Clearances'.
- The exhaust air should not be vented into a wall, a ceiling, or a concealed space of a building
- The power supply cable is not accessible through cupboard doors or drawers.
- The isolating switch is easily accessible by the customer.
- You use heat-resistant and easy-to-clean finishes (such as ceramic tiles) for the wall surfaces surrounding the cooktop.
- The cooktop will not be installed directly above a dishwasher, fridge, freezer, steam oven, washing machine or clothes dryer, as the humidity may damage the cooktop electronics.
- The installation will comply with all regulations relating to the discharge of air, clearance requirements and other applicable standards and regulations.
- You consult local building authorities and by-laws if in doubt regarding installation.
- The installation will comply with all regulations relating to the discharge of air.

### DURING INSTALLATION

#### Please ensure the following:

- Flush mounting or sealing this appliance into the bench with silicone or glue may make future servicing difficult. Fisher & Paykel will not be liable for any costs associated with removing or replacing a sealed-in appliance, nor for repairing any damage that may be incurred by doing this.
- Seal exposed bare edges of the cutout with an oil-based paint or moisture-proof polyurethane to prevent possible moisture creeping between the cooktop trim and the benchtop.
- Take extreme care not to chip, crack, or break the top glass surfaces during installation. A heavy metal tool or part accidentally dropped on the glass could damage it.
- If, after following the instructions given, correct performance cannot be achieved, please contact your nearest Fisher & Paykel Authorised Service Centre, Customer Care, or contact us through our local website listed at the end of this document.

#### **WARNING!**

**The owner carries all risk for flush mounting the cooktop. The owner must ensure the cooktop has been cut out from the countertop before servicing can be carried out. Fisher & Paykel will not be liable for any costs associated with removing or replacing a flush-mounted and/or sealed-in product, nor for repairing any damage that may be incurred by doing this.**

## TOOLS AND COMPONENTS

### PARTS SUPPLIED

- Keep all packing materials until the unit has been inspected.
- Inspect the product to ensure there is no shipping damage. If any damage is detected contact the dealer or retailer you bought the product from to report the damage.
- Fisher & Paykel is not responsible for shipping damage.

10 x 3.25" sheet  
metal adapter

Side clips (4)

Foam tape (1)

### TOOLS REQUIRED

Wrench

Crosshead  
screwdriver

Silicone

Cutter

Hex key

Router

Duct tape

PRODUCT DIMENSIONS

## CUTOUT

### PROUD INSTALLATION

PLAN

FRONT

CUTOUT DIMENSIONS	INCHES	MM
Ⓐ Overall width of cutout	31 3/4	807
Ⓑ Overall depth of cutout	19 3/8	492
Ⓒ Minimum depth at rear	2	50
Ⓓ Corner radius of cutout	max 3/8	max 10

### FLUSH INSTALLATION

PLAN

FRONT

CUTOUT DIMENSIONS	INCHES	MM
Ⓐ Overall height of routed recess*	1/4	6
Ⓑ Overall width of routed recess	36 7/32	920
Ⓒ Overall depth of routed recess	20 1/2	520
Ⓓ Overall width of cutout	31 3/4	807
Ⓔ Overall depth of cutout	19 3/8	492
Ⓕ Minimum depth at rear	2	50
Ⓖ Corner radius of routed recess	3/16	4.5
Ⓗ Corner radius of cutout	max 3/8	max 10

\*Shimming may be required to align glass flush with benchtop. Shims not supplied.

CLEARANCES

CLEARANCE DIMENSIONS	INCHES	MM
Ⓐ Minimum clearance from cook surface to: <ul style="list-style-type: none"><li>• Unprotected overhead cabinet centered above cooktop*†</li><li>• Protected overhead cabinet centered above cooktop*†</li></ul>	30 24	762 610
Ⓑ Minimum clearance below countertop**	16 5/16	415
Ⓒ Minimum clearance from side of cutout to nearest adjacent combustible surface	2 9/16	65
Ⓓ Maximum depth of combustible overhead cabinetry	13	330
Ⓔ Minimum distance between overhead cabinets (centred above cooktop)	36	915
Ⓕ Minimum clearance from rear of cutout <ul style="list-style-type: none"><li>• Minimum clearance from rear of cooktop</li></ul>	2 1 9/16	50 39
Ⓖ Minimum ventilation gap at the front of the cooktop	3/16	5
Ⓗ Minimum diameter of ventilation holes equivalent to 6 3/16in² (40cm²)		

\*Combustible surface definition: any materials of a building structure or decorative structure made of wood, compressed paper, plant fibres, vinyl/plastic or other materials that are capable of transferring heat or being ignited and burned. Such material shall be considered combustible even though flame-proofed, fire-retardant treated or surface-painted, or plastered.

†Ⓐ = 30" (762mm) minimum clearance between the top of the cooking surface and the bottom of an unprotected wood or metal cabinet; or Ⓐ = 24" (610mm) minimum when bottom of wood or metal cabinet is protected by not less than ¼"-thick flame-retardant millboard covered with not less than No. 28 MSG sheet steel, 0.015"-thick stainless steel, 0.024"-thick aluminum, or 0.020"-thick copper.

\*\*From underside of cooktop glass. Required for cleaning access.

ELECTRICAL CONNECTION

CONNECTION LOCATION

- Before connecting the cooktop to the mains power supply check that:
- The domestic wiring system is suitable for the power drawn by the cooktop.
  - The voltage corresponds to the value given in the rating plate.
  - The power supply cable sections can withstand the load specified on the rating plate.

CONNECTION	MAX. CURRENT DRAW	MAX. LOAD	VOLTAGE
3 Wire	32A	7800W	120/240 V
4 Wire	34A	7100W	120/208 V

BASE

3 WIRE CONNECTION

- Using UL listed wire connectors, connect the 2 black wires together and the 2 red wires together. Connect the green (or yellow-green) and white cooktop cables to the white (neutral) wire in the junction box using the UL listed wire connectors
- Install junction box cover.

4 WIRE CONNECTION

- Using UL listed wire connectors, connect the 2 black wires together, the 2 red wires together and the 2 white wires together. Connect the green (or yellow-green) ground wire from the cooktop cable to the green (or yellow-green) ground wire in the junction box using UL listed wire connectors.
- Install junction box cover.

1

Turn the cooktop upside down on a protective cover.

2

Apply adhesive foam seal around the glass overhang, 5mm from the edge of the glass.

Ensure the adhesive side facing is down to form a continuous seal around the cooktop.

3

Trim the excess sealing material using a sharp cutter or trimmer knife.

Take care not to damage the benchtop.

4

Slot the supplied metal adapter to the rear of the cooktop.

5

Attach the four side clips to the cooktop chassis.

Ensure the clips are oriented correctly.

6

Align any ducting to the outlet on the cooktop before lowering it into the cutout.

Tape ducting to secure.

## INSTALL COOKTOP - FLUSH

## INSTALLER CHECKLIST

### TO BE COMPLETED BY THE INSTALLER

#### GENERAL

- ☐ Read safety and warnings in the user guide before operating the cooktop.
- ☐ Specified clearance maintained.
- ☐ Unit is level – front to back and side to side.
- ☐ All packaging materials have been removed.
- ☐ Touch controls and displays are functioning.
- ☐ Cooking zones are functioning correctly. Turn on all of them to a high setting and leave them on for at least one minute.
- ☐ There is a constant flow of cool air from the cabinetry to the base of the cooktop.
- ☐ Cooktop is securely clamped.
- ☐ Basic operation has been demonstrated to the customer.

#### VENTILATION

- ☐ Ensure any ducting components are secure.
- ☐ Check outlets are clear and not obstructed.

#### ELECTRICAL

- ☐ Correct Rated Over-current protection is provided.
- ☐ Adequate ground connection.
- ☐ Power supply cable is not touching the cooktop and accessible.
