

# Induction Cooktop, 36", 4 Zones with Integrated Ventilation

Series 9 | Minimal

Black Glass

A true two-in-one appliance, combining the precision of induction cooking with powerful extraction in one seamless, stylish cooktop.

- Seamless kitchen integration, without the need for overhead ventilation
- Four cooking zones, including simple pairing of two zones to create a SmartZone
- With nine fan speeds plus boost, select the perfect extraction rate for your cooking

- Minimal style, sleek black glass finish to suit any kitchen design

## DIMENSIONS

Height	8 9/16"
Width	36"
Depth	20 1/4"

## FEATURES & BENEFITS

### Seamless integration

Offering true design freedom, this cooktop can be placed anywhere – eliminating the need for bulky overhead ventilation and helping to create a seamless flow between kitchen and living spaces. Installed raised or flush, it's perfect for islands, or homes with high ceilings.

### Elegant design

The subtle black glass and durable matte black detailing blend elegance with durability. With premium styling, these cooktops seamlessly blend with other appliances for a cohesive, considered kitchen design.

### Precise control

Fisher & Paykel induction cooktops offer extremely accurate temperature control from very high to very low heats, so you can sear, sauté and temper like a pro. Touch&Slide controls react immediately when you adjust the temperature, so you can go from a boil to a simmer in seconds.

### Effective extraction

Designed for busy homes, the integrated ventilation works effectively and unobtrusively in the background. Featuring nine fan speeds, plus a boost function, for quickly removing odors and steam.

### Safety of induction

Induction cooktops only start heating your pot or pan once you've placed it on the surface and stop as soon as you remove it – so they are safer for everyone.

### Ease of use

Designed for simple removal, the grease filter tray effectively captures spills, while the single glass cooking surface can be easily wiped clean. A flush ventilation grille allows pots to effortlessly slide across the cooktop surface.

### Superior efficiency

Less heat is wasted during induction cooking because only the cookware is heated, not the cooktop surface. This makes induction cooking more energy-efficient than electric or gas cooktops.

## SPECIFICATIONS

### Accessories

Ducting adaptor	537355 Duct sheet metal
-----------------	-------------------------

### Cleaning

Dishwasher safe grease filter	•
Flat easy clean glass surface	•
Flush grille	•
Pan detection system	•
